\* Price includes ....

- \* A rental transponder chip or disposable tag for all participants;
- \* Data entry services for all race day registrants;
- \* Set-up of a primary and back-up timing system at the finish line;
- \* Set-up and use of our finish line arch, corral and time clock;
- \* Race results printed out and provided to the race director immediately following the race (for awards)
- \* Race results sent to you within 6 hours of event:
- \* A \$350 surcharge will be applied to the above pricing for events whose distance is Half Marathon or longer.

*(The Race Director is responsible for providing 1 volunteer for every 100 participants at the event in order to hand out transponder chips and bib numbers on race day. In addition, the Race Director must provide a minimum of 2 - 3 volunteers at the finish line to collect transponder chips.)*

## **: FAQs - Timing Services**

### **Does Dirty Spokes Productions,LLC Timing Services require any special language be added to the race application?**

Yes. We require the following language be listed on the race application:

*"This event is being timed and scored by Dirty Spokes Productions,LLC Timing Services. On race day, participants will be required to pick-up a timing chip at least 1/2 hour prior to the start. The timing chip attaches to the ankle using an elastic strap. Failure to wear a timing chip during the event will prevent the participant from being timed and scored in the results. At the finish line, all timing chips and ankle straps must be returned to Dirty Spokes Productions,LLC Timing Services or the participant will be charged \$35.00 (if you are using the disposable chips no return necessary)."*

*Dirty Spokes Productions,LLC Timing Services also requires that we be listed on the "Waiver and Release" section of the race application which must be signed by all participants.*

## **When do we show up on race day?**

*Two hours prior to the start of your event. This gives us plenty of time to set-up the timing and scoring equipment, finish line bridge, banner, corral and time clock, and train your volunteers on chip distribution and collection procedures.*

## **How are the timing chips distributed to participants?**

*On race day, we provide alphabetized lists of all pre-registered athletes to the Race Director. These alphabetized lists contains the full name, assigned chip / bib number (same number with our system), event type, gender, age and t-shirt size for each pre-registered athlete. We also deliver boxes filled with numerically ordered envelopes that contain a timing chip with ankle strap and race bib.*

*When pre-registered athletes check in on race day, the volunteers look up their name and assigned chip/bib number on the alphabetized list and then pulls the corresponding chip/bib envelope from a box. A mailing label with the pre-registered athlete's name, assigned chip / bib number, event type, gender, age and t-shirt size is also stuck on each envelope.*

*We also deliver boxes of unassigned chip / bib envelopes for raceday registrants. Volunteers who process race day registrants will only need to collect the entry fee and write down the chip / bib number they assign on the completed race application form. These completed raceday applications are then given to our data entry personel. It is that easy.*

*Please note, the race director is required to provide 1 volunteer for every 100 participants at the event in order to hand out chip/bib envelopes. Dirty Spokes will provide 1 employee to oversee the volunteers at the registration tables since questions can and will arise on race day.*

## **Is the starting line format any different than for a non-chip timed race?**

*No. It is exactly the same.*

## **How are the timing chips collected at the finish line?**

*After the participant crosses the antenna mats at the finish line, a volunteer will direct them to remove their timing chip and throw it in the collection bucket. The ankle strap system allows for the timing chip to be removed in seconds so that the participant can move quickly out of the finish line area to the post-race party. The ankle strap system minimizes the chances of a back-up at the finish line or the need for additional volunteers to assist participants with the removal of their timing chip. The race director will be required to provide a minimum of 2 volunteers to collect the timing chips at the finish line. If you use the disposable chip / bib system no collection is necessary (no extra volunteers).*

## **What are the payment terms for timing and scoring an event?**

*A \$400 non-refundable deposit must be paid up front to lock in the race on our race calander. This deposit is applied toward any unpaid balance owed for timing services. Full payment for all timing services must be made (10) days after your race date. No exceptions.*
